3. App Flow - User journey

This document shows how users move through the app (routes and steps).

Marketing website pages (current landing)

- Home / Hero
- How it works
- What you get
- Why LUCE
- Who it is for
- Pricing
- FAQ
- Login / Create campaign buttons

Main app routes (Next.js)

- /login - Google/Gmail login
- /dashboard - saved campaigns
- /campaigns/new - start
- /campaigns/[id]/confirm - check product
- /campaigns/[id]/research - research
- /campaigns/[id]/strategy - strategy
- /campaigns/[id]/generate - generate
- /campaigns/[id]/results - review
- /campaigns/[id]/download - ZIP
- /billing - plans

Happy path (easy flow)

Login -> Dashboard -> New campaign -> Add product -> Confirm -> Research -> Strategy -> Generate -> Review -> Download ZIP -> Post manually.

Modules in the flow

- Auth: Google login
- Transcribe: read product URL/images into data
- Clipping: make short UGC/video clips
- Plans: Free vs Paid limits
