5. Schema - Data and storage

This document explains what we save in Firebase and who can access it.

Main data (simple)

- users - account, plan (free/starter/pro)
- products - product name, details, photos
- campaigns - status and settings
- research - market/competitor notes
- strategy - audience, message, CTA
- assets - images, videos, captions
- usage - monthly limits count

File storage folders

users/{userId}/products/... for source photos. users/{userId}/campaigns/... for generated files and campaign.zip.

Access control (who can see what)

- Only logged-in owner can read/write their data
- Server writes usage and jobs
- Downloads use temporary signed links
- Plan limits checked on server before generate

Remember

Flow: User -> Product -> Campaign -> Research/Strategy -> Assets -> Dashboard -> Download.
