6. Implementation Plan - Build phases

This is the step-by-step build plan for the team.

Phase 0 - Setup

- Next.js project
- Firebase + Vercel + GitHub
- Basic logger and tests

Phase 1 - Auth (Gmail)

- Google login
- Create user record
- Protect dashboard
- Welcome email (Resend)

Phase 2 - Transcribe

- Read product from URL or photos
- Fill product fields
- Confirm screen for user edits

Phase 3 - Clipping

- Generate UGC / short videos
- Save to Storage
- Preview + regenerate

Phase 4 - Full campaign

- Research + strategy
- Images, social, ads
- ZIP download + dashboard

Phase 5 - Plans / Paid

- Free limits
- Starter/Pro upgrade
- Block generate when limit reached

Phase 6 - Finish

Fix errors, finish tests, connect custom domain (A-record), launch on Vercel.
