7. Testing Milestone - How we prove it works

Testing proves Auth, Transcribe, Clipping, and Plans work. Also shows logging, errors, and unit tests (about 7 marks).

What we test

- Unit tests = small code checks
- Manual tests = click through the app
- End-to-end = full campaign from login to ZIP

Must-pass checklist

- [ ] Google login works
- [ ] Add product URL or photos
- [ ] Confirm product
- [ ] Research and strategy appear
- [ ] Videos/images generate (clipping)
- [ ] Download ZIP works
- [ ] Free plan limit blocks extra campaigns
- [ ] Error messages are clear + retry works
- [ ] Logs show module + request id
- [ ] npm test passes

Demo for sir (quick)

- 1. Show a failed URL -> clear error + log
- 2. Show plan limit -> upgrade message
- 3. Run unit tests -> all green
- 4. Complete one full campaign download
